

ZANZARTAP[®]

LA TAPPARELLA CON ZANZARIERA INTEGRATA

La caratteristica fondamentale di questo profilo consiste nella presenza della **microforatura** su tutta la superficie del gancio.

Tale particolarità permette, ad avvolgibile abbassato, oltre alla funzione oscurante, **un'efficace prestazione come zanzariera e un'ottima visuale verso l'esterno**, contemporaneamente al mantenimento della **privacy**.

ZANZARTAP è realizzata con un gancio più alto e resistente rispetto alla tapparella tradizionale, e, allo stesso tempo, **interamente microforato**.

Ciò consente **un maggiore riciclo dell'aria, la possibilità di oscuramento graduale e**, non per ultimo, **una barriera contro gli insetti indesiderati**.

GAMMA COLORI ZANZARTAP

È stata riprodotta la migliore rappresentazione possibile dei colori della nostra collezione. Differenze tra questi colori e i colori del campionario non sono contestabili.
